ABOUT ME

Innovative and reliable software development student skilled in Java and Python, with experience in frameworks like Django. I bring creativity to problem-solving, thrive in collaborative environments, and adapt quickly to the evolving tech landscape. Motivated by continuous learning, I am always eager to explore new technologies and contribute meaningfully to dynamic development teams.

EDUCATION

WETHINKCODE_

SEP 2024 - PRESENT

Occupational Certificate in Software Engineering

- Gained strong knowledge in software engineering, programming, databases, information systems, and project management, with emphasis on applying mathematical and analytical skills.
- Built hands-on skills in database design, manipulation, and system deployment, supported by experience in debugging and maintaining applications.
- Developed practical expertise in software design, development, and testing, ensuring solutions are reliable, efficient, and aligned with client needs

TSHWANE UNIVERSITY OF TECHNOLOGY

FEB 2020 - DEC 2023

Diploma in Information Technology

- Skilled in working with virtual machines and virtualization tools to simulate and manage computing environments effectively.
- Experience in computer networking using tools like Packet Tracer to design, configure, and troubleshoot network systems.

WORK EXPERIENCE & VOLUNTEERING

Technical Mentor

Sep 2025 - PRESENT

WeThinkCode_

- Guides and supports students by explaining technical concepts, reviewing code, and providing practical problem-solving strategies.
- Fosters growth and collaboration through mentoring, feedback, and encouraging the development of both technical and professional skills.

Event Coordinator (Volunteering)

Oct 2024- PRESENT

WeThinkCode_ Student Social Wellness Committee

- Promotes student well-being by organizing initiatives and activities that support mental, emotional, and social health.
- Represents student needs and concerns, collaborating with peers and staff to create a supportive and inclusive campus environment.
